# HIGH PERFORMANCE: NET ZERO READY

... AN ESSENTIAL PIECE OF THE PUZZLE

### Extreme Panel TECHNOLOGIES, INC.

**STRUCTURAL INSULATED PANELS** 

### THE EXTREME PANEL DIFFERENCE

SIPs Done Right!

Extreme Panel is a **FAMILY-OWNED COMPANY** that takes pride in its reputation for its quality and customer service.

Extreme Panel's manufacturing process features a fully automated 8' x 24' jumbo press and a state-ofthe-art Hundegger CNC machines - our panels are

### THE MOST PRECISE IN THE SIPS INDUSTRY.

% Extreme's manufacturing process is

#### ENVIRONMENTALLY RESPONSIBLE.

Our OSB is FSC-certified. Extreme's pre-cut packages greatly reduce on-site waste and all factory material waste is recycled.

Extreme Panel has MORE CERTIFIED SIPA MASTER BUILDERS than any other SIPS manufacturer.

## EXTREME ENERGY EFFICIENCY

### NET ZERO POSSIBILITIES

#### **HERS**<sup>°</sup> Index

**CC** 

THE **NET ZERO** ENERGY CONSUMPTION PRINCIPLE IS VIEWED AS A MEANS TO REDUCE CARBON EMISSIONS AND REDUCE DEPENDENCE ON FOSSIL FUELS.

A HOME ENERGY RATING INVOLVES AN ANALYSIS OF A HOME'S CONSTRUCTION PLANS AND ONSITE INSPECTIONS. THE **HERS INDEX** IS A SCORING SYSTEM ESTABLISHED BY THE RESIDENTIAL ENERGY SERVICES NETWORK WHERE THE LOWER A HOME'S SCORE, THE MORE ENERGY EFFICIENT IT IS IN COMPARISON TO THE HERS REFERENCE HOME.

#### CUT ENERGY COSTS UP TO 60%!

"SIPS PROVIDE BETTER OVERALL AIR TIGHTNESS AND PRACTICAL THERMAL PERFORMANCE THAN CONVENTIONALLY FRAMED WALLS."

~ NATIONAL ASSOCIATION OF HOME BUILDERS

Net Zero is defined as a structure with zero energy consumption and zero carbon emissions annually.

**ARE NET ZERO READY!** 

**EXTREME PANEL STRUCTURES** 

The single greatest opportunity to conserve energy is through the building shell, specifically its air tightness. The second greatest factor is in the building's R-value.

#### EXTREME SIPS ARE LESS EXPENSIVE when viewed as a system, rather than just a component

Air tight structures require small heating and cooling loads, often saving up to 50% on initial cost of HVAC equipment.

All panels are pre-cut to exact specifications. Complex angles that take hours to custom build on site with sticks can take a fraction of the time in our manufacturing facility.

#### Cost of Ownership\*

Extreme

	Efficient Home	<u>SIP Home</u>
Cost to Build	\$250,000	\$260,000
Down Payment	\$50 <i>,</i> 000	\$52,000
Interest	5.5%	5.5%
Monthly Payment	\$1136	\$1153
Avg. Monthly Utilities (power/gas)	\$150	\$90
Total Monthly Expenses	\$1289	\$1243
Monthly Savings		\$46

Non-Energy

Even with higher monthly mortgage payments, the owner of the SIP home can have reduced living expenses every month. \*Individual circumstances will vary.

Framing and insulating is done at the same time reducing on-site labor.

Walls are straighter, which results in fast work for sub-contractors hanging sheetrock, cabinets, windows and doors.

With pre-routed electrical chases, wiring installation is up to 20-30% faster.

#### **EXTREME MANUFACTURING**

Extreme Panel's commitment to precision and efficiency are unmatched in the SIPs market. Extreme features the only fully automated 8'x24' laminating press in the industry and a state-of -the-art Hundegger CNC machine. The Hundegger has a router, a chainsaw blade and a 40" circular blade. The router moves on 4 axis while the circular and chainsaw blades moves on 5 axis, which provides extreme accuracy on even the most complicated compound cuts.

Extreme Excellence To ensure precision and quality, all panels are cut on our Hundegger CNC. Our one-of-a-kind fully automated jumbo press was designed by our owner, Terry Dieken.

### HEALTHY & COMFORTABLE

An Extreme Panel structure is up to <u>15 TIMES MORE AIR TIGHT</u> than stick framing. The lack of air infiltration of Extreme Panel homes means it's easier to maintain a comfortable living environment, they're quieter, and they have less dust, allergens and humidity.

### STRENGTH

As compared to a steel I-beam with a center web and a top and bottom flange; the Extreme Panel home gets its strength from the bonding of the SIP-grade OSB skins to its center expanded polystyrene foam core.

### A FAMILY-OWNED CORPORATION SINCE 1992

The company has evolved from two employees on the family farm to a state-of-the-art 65,000 sq. ft. office and manufacturing facility. As founders and owners of Extreme Panel, Terry and Linda have instilled in their company the importance of providing quality and integrity, not just making <u>sales</u>. They are both actively involved in the daily operation of the business. Most of their employees have been with Extreme at least ten years, which reflects the company's commitment to training and retaining skilled personnel. Throughout the years they have continually updated their equipment resulting in the most automated system in the SIPs industry.

Extreme Panel follows an extensive quality control program, has been a member of the Structural Insulated Panel Association (SIPA) from the beginning, and they proudly support their community, the local school district and charity organizations such as Habitat for Humanity.
