

SAVE TIME. SAVE MONEY. SAVE THE ENVIRONMENT.

EARTH-FRIENDLY & ENERGY-EFFICIENT

We Manufacture Superior, High-Performing SIPs

EXTREME PANEL
TECHNOLOGIES

THE EXTREME ADVANTAGE

The *Smart* and *Green* alternative to Traditional Stick-Built Construction

- Reduced construction labor costs
- Shorter construction times for framing, roofing, and skinning
- Increased structural integrity
- Higher quality level for flat surfaces
- Greater insulation values and energy-efficiency for end-users
- Less expensive and faster alternative to modular shipping
- Less on-site waste and environmental contamination

COMPATIBLE WITH TRADITIONAL BUILDING METHODS

Extreme SIPs can seamlessly integrate into existing building methods.

With Extreme SIPs, architects can increase their design flexibility and end-users can enjoy the primary benefits of SIPs (as well as the unique features exclusive to our product) while integrating with other building methodologies.

Extreme SIPs have integrated with:

- Traditional Wood and Steel Framing
- ICFs and Poured Concrete
- Modular

DESIGNED FOR INHABITANT HEALTH & COMFORT

Extreme SIPs enable architects and builders
to deliver healthier buildings:

- Zero panel off-gassing
- 'Red list' chemical-free envelope
- Panels free of dyes, formaldehyde, and hydro fluorocarbons
- Envelopes that are moisture, fungus, carpenter ant and termite resistant
- Consistent and comfortable user interior temperatures with vastly reduced energy consumption
- Elimination of draft due to poor seal and gaps
- Reduced building interior contaminant infiltration

WE ARE PARTNERING TO CREATE A MORE RESPONSIBLE BUILT ENVIRONMENT

We are a leader in the high-performance home, construction science, and manufacturing industries with a focus on solutions for our customers.

Building with Extreme Panel Technologies is not only a superior way of building for contractors and investors, the building method is also more earth-friendly and energy-efficient than traditional stick-built. Extreme Panel Technologies has SIPs (Structural Insulated Panels) as its foundational DNA, with several important distinctions.

**ECO-
FRIENDLY**

**SAVE
RESOURCES**

**SAVE
ENERGY**

**ZERO
VOCs**

**ZERO
WASTE**

YOUR PROJECT IS OUR PASSION

Extreme Panel Technologies has been manufacturing Structural Insulated Panels (SIPs) for over 30 years and has expanded to be one of the largest SIP manufacturers in North America.

Your project gets individual attention from design to delivery. We work with architects, designers, engineers, and contractors to supply our SIPs.
